

Australian Mountain Biking Interschools | 15 – 18 March

The Australian MTB Interschools gives young riders a special chance to experience mountain biking and the enthusiasm and energy of this rapidly growing sport in a competitive, educational and supportive atmosphere. The primary aim is to promote participation and evoke interest in competitive biking in the younger generation. Over the four days the future stars of the sport will battle it out over the disciplines of Cross Country, Downhill, Flow, Pump Track & XC Relay.

Kids at primary school are in Division 4. That means they can race the flow track, cross country and the pump track or they can just do the cross-country race. Thredbo told me this event is appropriate for kids from year 4 up but to do the flow track your child will need to have some previous mountain bike experience. All competitors need a club licence or an MTBA day licence (these can be purchased at rego). All entries will close at 4pm Monday 12th March 2018.
